## Heat and flame-resistant fabrics

Toray Textiles Europe Ltd has launched a revolutionary range of heat and flame-resistant fabrics.

ThermGuard High Visibility and ThermGuard Molten Repel are designed to protect industrial workers exposed to thermal hazards, low visibility, electric arcs and molten metal splashes. These new inventions have been developed in collaboration with customers, laundries and end users and specifically those working in utilities, rail, chemical and petrochemical, airports, foundries and heavy industry sectors to ensure outstanding quality and comfort is coupled with enhanced performance.

These innovative fabrics are breathable, comfortable to wear and stable to industrial washing while retaining excellent light and colour.
